#### **WORK EXPERIENCE**

#### **Tesla** | Engineering Program Manager Intern

Sep 2021 - Present

- Leading efforts across 5 projects and collaborating with 12 multidisciplinary groups to meet cost, schedule, and quality goals for the Electronic Systems team.
- Defining program roadmaps and coordinating component/vehicle-level validation to scale low voltage products from prototype to production.
- Initiating weekly syncs and communicating design changes to Senior Engineers, Directors, and VPs through reports and presentations.
- Managing and releasing bills of materials through engineering change orders to align 10+ stakeholders on design changes forecasted to save \$3.6M in variable costs.

## **Applyboard** | Product Design Intern

Jan 2021 - Apr 2021

- Reformed design team operations by introducing weekly design critiques and by establishing a new virtual onboarding process for the product design team.
- Led the redesign of a requirements editor feature for 100+ Customer Experience employees, reducing the number of application setup steps by 50%.

#### TD Bank Labs | Experience Design Intern

Jun 2020 - Aug 2020

- Pitched and defined the product roadmap for TD Bank Lab's first design system, earning buy-in from Designers, Engineers, and Managers.
- Conducted stakeholder interviews and gap analysis to identify and define 7 critical features for the design system.

## Manulife | UX Design Intern

Sep 2019 - May 2020

- Led an 11 person team to define the product vision, design, and development of Manulife's first engineering outreach web platform (developer.manulife.ca).
- Pitched usability testing options to company executives, resulting in their implementation in current engineering projects.

#### **EXTRACURRICULAR ACTIVITIES**

### Midnight Sun Solar Car Team | Operations Manager

Sep 2018 - Present

- Defined the vision, multi-year roadmap, and success metrics as the manager of the Hardware, Mechanical Interiors, UI/UX, and Business subteams.
- Established and led a team of 11 designers to research, design, and prototype the car's driver display and telemetry dashboard.
- Co-led a crowdfunding campaign to raise \$8,900 and secured \$60,000 in funding for the previous vehicle, Midnight Sun XIV.

# UW/UX | Logistics Lead

Sep 2019 - Sep 2021

• Led workshops at *Hack the North 2020++, TILE 2021* , and *EngHack 2021* to teach visual design and prototyping skills to 450+ students.

## **EDUCATION**

#### **University of Waterloo**

Systems Design Engineering Sep 2018 - Present

Relevant Coursework: Engineering Prototyping, Human Factors in Design, Data Structures and Algorithms, Circuits

#### **TOOLKIT**

### Management

Enovia, Jira, Confluence, Altium 365

## Design

Figma, Sketch, Axure, Photoshop, Illustrator, After Effects, Solidworks

## Development

HTML, Python, C++, Git, Android Debug Bridge

#### **Skills**

Product Lifecycle Management, Product Data Management, Agile Methodology, User Research and Testing

#### **PERSONAL PROJECTS**

#### Music Hear | Android

An ear training practice tool used to prepare for practical music exams.

## Bite Check | iOS

A search-based tool used to find allergy-safe snacks and restaurants.
